For Return to Dark Tower game. I need a list of Potions, Gear, Virtues, Magic Items. Include as much information as possible, image would be great (URL or image file).

Here's a source-backed reference for Return to Dark Tower, with card photos where available. One important limitation: I could verify the potion names, gear names, and the base heroes' unlockable virtues, but I could not locate a reliable, complete transcription of all 22 treasure cards. I've marked missing details rather than inventing card text.

I'm treating "Magic Items" as **treasures**: the game's official item categories are potions, gear, treasures, and quest items. Virtues are hero abilities rather than items. [1]

1. Potions

The base game includes 18 potion cards. Potions are one-use items: spend the card to activate its effect. You can carry unlimited potions, and normally gain one by drawing the top card of the potion deck. [1] [2]

The following six potion names appear in the base-game unboxing. The table distinguishes verified effects from effects I could not reliably transcribe. [3]

Potion	Effect / available information	Verification
Potion of Dragon's Teeth	Spend to gain 6 warriors.	Explicitly described in unboxing and playthrough transcripts. [3] [4]
Potion of Purifying Breath	Spend to remove up to 2 skulls from any building.	Explicitly read during the unboxing. [3]
Potion of the Siren Song	Spend to move any foe up to 2 spaces.	Explicitly read during the unboxing. [3]
Potion of the Golden Sun	Spend to gain spirit; the retrieved transcript does not reliably establish the printed quantity.	Demonstrated in a playthrough. [5]
Potion of Fortune's Favor	Name verified; exact effect not reliably retrieved.	Identified during the unboxing. [3]
Potion of the Thousand Strides	Name verified; exact effect not reliably retrieved.	Identified during the unboxing. [3]

How to obtain and use them

- At a citadel, the free reinforce effect grants 1 potion.
- Potions can be used only during your own turn.
- The Relic Hunter's Crafty virtue doubles the number on a potion when you spend it. [1] [2] [6]

2. Gear

There are six gear types, with 18 gear cards in the base box. Gear provides ongoing benefits rather than being discarded whenever used, although another effect can require you to lose or spend it. You may carry at most one of each gear type. [2]

The photograph above shows all six gear types. The exact spellings below follow the photographed-card description; effect details are included only where the retrieved text supports them.

Gear	Effect / available information
Dusky Cloaks	Shown in the six-card gear photograph; exact effect not reliably transcribed in the retrieved text. [2]
Blessed Sceptres	After you reinforce, remove a skull from a building of your choice. [7]
Trusted Maps	Shown in the six-card gear photograph; exact effect not reliably transcribed in the retrieved text. [2]
Brass Talismans	Shown in the six-card gear photograph and identified in the unboxing; exact effect not reliably transcribed. [3] [2]
Longswords	Provides 1 Melee advantage. [7]
Leather Armor	Shown in the six-card gear photograph; exact effect not reliably transcribed in the retrieved text. [2]

At a bazaar, the free reinforce effect lets you choose a gear card from the available gear stacks. Unlike potions, gear is selected rather than drawn randomly. [1] [2]

3. Virtues

Each base-game hero starts with two character-specific virtues printed on their hero board, plus a kingdom virtue. Each also has three initially inactive virtues that can be unlocked. Reinforcing at a citadel and spending 5 spirit unlocks one virtue. [2]

Base-game unlockable virtues

The following is the complete set of 12 unlockable virtues for the four base-game heroes. Effects are paraphrased from a community reference, not presented as verbatim official card text. [6]

Hero	Virtue	Effect
Brutal Warlord	Callous	After you battle, if you lost at least 10 warriors, gain a treasure from the market.
Brutal Warlord	Inspiring	After you reinforce, gain 6 warriors.

Hero	Virtue	Effect
Brutal Warlord	Relentless	If you double your move, gain +1 Wild advantage.
Relic Hunter	Lucky	When you spend—not lose—a treasure, gain the top card of the treasure deck.
Relic Hunter	Crafty	When you spend a potion, double the number on it.
Relic Hunter	Inventive	Spend 4 potions to remove a foe from your space.
Spymaster	Fortunate	You may reinforce twice per turn at the same building.
Spymaster	Unseen	When you finish a monthly quest, you may remove a foe instead of gaining spirit.
Spymaster	Resourceful	At the end of each month, gain 15 warriors.
Orphaned Scion	Blessed	Spend 1 spirit to prevent up to 6 warrior losses from a battle card or dungeon room.
Orphaned Scion	Infused	At the start of your turn, remove 1 skull from a building in your home kingdom.
Orphaned Scion	Anointed	Gain +1 Wild advantage for each building with no skulls on or adjacent to your space.

All 12 entries above are supported by the community virtue compilation. [6]

Additional expansion virtues located

The same compilation includes these expansion-hero virtues. This is not a complete expansion virtue inventory: the author specifically omits virtues tied to certain heroes' unique class mechanisms. [6]

Hero	Virtue	Effect, paraphrased
Devious Swindler	Fortuitous	After rolling the haggle die, you may reroll once and take the better result.
Devious Swindler	Calculating	You may ignore warrior and spirit losses on Critical Hit battle cards.
Devious Swindler	Opportunistic	When any player gains a treasure from the market, gain a blessing.
Haunted Recluse	Sinbearer	At the end of the month, you may spend 12 warriors to remove all skulls from your current kingdom.
Haunted Recluse	Shadowspinner	Gain +1 Wild advantage for each building with skulls on or adjacent to your space.
Haunted Recluse	Soulreaper	Prevent 2 warrior losses per battle card for each skull on or adjacent to your space.
Undaunted Aegis	Steeled	Once per battle, if another hero would gain a corruption, you may gain it instead and gain 2 spirit.
Undaunted Aegis	Emboldened	Gain +1 Wild advantage for each corruption you have.
Undaunted Aegis	Resolute	When you reinforce, spend 1 less spirit for each corruption you have.

These nine entries come from the same community compilation; consult the physical components for exact timing and wording. [6]

What is still missing from the virtue inventory

The tables do not include:

- The names and full text of the base heroes' printed starting virtues.
- The four kingdom virtues.
- A complete list of virtues for all expansion heroes.

The base box contains 16 virtue tiles, whereas the 12 unlockable hero virtues above account for only the three tiles belonging to each of the four heroes; kingdom virtues are part of the starting setup as well. [2]

4. Magic items / treasures

The base game contains 22 treasure cards. Treasures generally provide stronger effects than gear, often combining an advantage with an additional ability. Some have ongoing effects; others must be spent. You can carry up to four treasures. [2]

Treasure rules

Property	Rule
Market setup	Reveal 3 treasure cards.
Acquisition	Choose a face-up treasure when an effect grants one.
Bazaar purchase	Spend 2 spirit when reinforcing to gain 1 treasure instead of the free gear effect.
Refill	Replace a treasure that leaves the market with the top card of the treasure deck.
Carrying limit	Up to 4 treasures; if you gain a fifth, lose one.
Timing	Items can be used only on your own turn.

These are the base-game rules; expansion rules can modify the market. [1] [8] [2]

Inventory limitation

I could not verify a complete, correctly spelled list of all 22 treasures or their effects from the accessible sources. The retrieved image descriptions and video transcripts contain inconsistent names, so I have not treated those as a trustworthy inventory.

A potentially useful lead is the BoardGameGeek thread "Return to Dark Tower – Expansion Info." Its author says they created a spreadsheet detailing the complete contents after checking with Restoration Games. The thread appeared in search, but its spreadsheet was not accessible through the retrieval tool. [9]

5. Image and reference sources

For photos you can inspect or use as transcription references:

Source	What it provides
GeekDad's "Reaping the Rewards: Return to Dark Tower"	Photographs of all six gear types, all 12 base-game unlockable hero virtues, potion examples, treasure examples, and quest items. [2]
"Unboxing Return to Dark Tower by Restoration Games!"	A visual pass through the potion, gear, treasure, companion, and other decks. The potion and gear discussion begins around 18 minutes. [3]
Official second-printing rulebook	Rules reference for inventory, virtues, and item use—not a full card catalog. [10]

This gives you a verified starting reference, but it is not yet the exhaustive card database you requested. The main gaps are exact text for several potions and gear cards, the full treasure inventory, and starting/kingdom virtues. Photos or scans of those components would allow an accurate transcription without relying on unreliable video captions.
